

## MAAC Project Video Tours

The MAAC has posted two videos from its Maumee AOC project tours in 2018. Both tours focus on habitat restoration projects that were fast-tracked for funding through the MAAC. Each tour showcases interviews with project leaders and aerial views of the properties taken by drone. Tim Schetter with Metroparks of the Toledo Area gave an overview of the Howard Marsh Phase II plans and took MAAC members on a walking tour of the property; to view the video, click [here](#). Patrick Baranowski with ODNR and Russ Terry with Ducks Unlimited showcased the habitat restoration improvements going on at the Toussaint Wildlife Area; for access to this video, click [here](#). Both projects directly address BUI 14b – loss of fish and wildlife habitat. Enjoy the tours!
